

RINSE AID

WAREWASHING DRYING AGENT

This rinse additive for machine warewashing applications is designed to operate in low solids or soft water, and in lower temperature applications. Its purpose is to reduce spotting and hasten drying rate of all types of dinnerware. It behaves as a non-silicone foam control agent for industrial applications. Performs by reducing surface tensions of rinse water. In automatic car washes it promotes sheeting and drying.

FEATURES

- Concentrated, liquid
- Aids in rinsing
- Reduces foaming in equipment
- Speeds drying time
- Does not contain silicones

RELATED BENEFITS

- For institutional automatic warewash
- Reduces spotting
- Improves appearance of washed ware
- Less streaks
- No harm to machines

AREAS OF USE

- Hospitals, health care facilities
- Restaurants, cafeterias
- Hotels, motels, resorts
- Schools, child care centers
- Institutional facilities

TO USE

Use 1/4 ounce for each rack. **See label for complete directions and use only as directed.**

SPECIFICATION DATA

Available Sizes - 4/1G, 5G
Color - Blue
Flammable - No
Phosphorous - None
Specific gravity - 1.003

Physical State - Liquid
Fragrance - None added
Corrosive - No
USDA - None
pH - 7.0
