

HEAVY-DUTY LIME OFF

LIME & SCALE REMOVER

Remove stubborn lime and mineral deposits with this acid based cleaner. High phosphoric acid content coupled with a low foaming surfactant system provides rapid removal of tough mineral buildups. The acid dissolves mineral deposits and the surfactants suspend them to help clean surfaces. Low foaming properties enable this product to be used in warewashing machines as a descaler and lime remover. Not for use on aluminum.

FEATURES

- Phosphoric acid based
- Low foaming properties
- Versatile

RELATED BENEFITS

- Powerful, effective cleaner
- Ideal for use in warewashing
- Use on mineral deposits anywhere

AREAS OF USE

- Restrooms, shower walls, urinals, and sinks
- Steam tables, steam equipment
- Air conditioning systems
- Ice machines, water fountains
- Warewash machines
- Coffee urns, utensils

TO USE

Dishmachine, Steam Table Deliming & Heavy Deposits: Spray or brush onto surface undiluted. Allow to soak a few minutes. Agitate with a brush. Rinse. **Steam Coil Descaling:** Inject undiluted into coil; soak 1/2 hour; flush coil after cleaning. Repeat if necessary. Rinse thoroughly. **For Stainless Steel, Coffee Urns, and Glassware:** Prepare solution of 2 oz per gallon of water. Soak a few minutes. Agitate if necessary. Rinse thoroughly. **NOTE:** This product will chemically dissolve aluminum. Minimize exposure time and deli me only when necessary if coils are made of aluminum. **For applications, see label for complete directions and use only as directed.**

SPECIFICATION DATA

Available Sizes - 4/1G, 55G
Color - Green
Foaming - Low
USDA - A3
Viscosity - Thin
Specific Gravity - 1.21

Physical State - Liquid
Fragrance - Slightly Sweet
DOT - Corrosive
Petroleum Distillates - None
Acid Content - 27%
pH (2% solution) - 1.5
