

# LEVEL BEST

## ULTRA HIGH SOLIDS FLOOR FINISH

A single coat of this floor finish is so continuous that it acts as a sealer and a finish. A second coat is necessary only if the flooring has been poorly maintained or otherwise abused. This ultra high solids floor finish is a tough and flexible metal cross-linked acrylic, formulated to dry to a brilliant gloss. Buffing is not required to bring out a shine. However, buffing as a part of regular maintenance procedures prolongs the life of the floor.

This finish is non-yellowing and detergent resistant. It is easily repairable. Worn-out traffic areas can be recoated at any time without stripping. Removal of this finish is easy by using an active amine or ammoniated floor stripper.

### FEATURES

- Time tested polymer technology
- Outstanding slip resistance
- Positioned as a value floor finish
- Acts as a sealer and finish in one
- Designed for high traffic
- High speed burnishable

### RELATED BENEFITS

- Long lasting, deep, lustrous gloss
- Reduces liability potential
- Outstanding features for an average price
- Saves time and cost of labor
- Excellent gloss and scuff resistance
- For a conventional maintenance program

### AREAS OF USE

Use with electric burnisher maintenance routines

- Restaurants, hotels, motels, offices
- Hospitals, nursing homes, doctors offices
- Schools, universities, child care centers
- Grocery stores, malls, retail stores

### TO USE

Apply finish in a uniform, thin coat to stripped floor. Two to four coats are recommended for initial application. **For applications, see label for complete directions and use only as directed.**

### SPECIFICATION DATA

Available Sizes - 4/1G, 5G, 55G

Color - Milky White

Total Solids - 24.5%

Initial Gloss - Excellent

Slip Resistance - Exceeds ASTM 2047

Specific Gravity - 1.04

Physical State - Liquid

Fragrance - Acrylic

Metal Interlocked - Yes

Burnisher Response - Excellent

Traffic Area - High

pH - 8.1
