

# Sparkle

## **DESCRIPTION**

*Sparkle is a proven formula combines the maximum practical detergent concentration, plus, lotion mildness to make possible the finest hand dishwash liquid that is soft and gentle to the hands.*

## **DIRECTIONS:**

*Remove food before washing. Add ¼ ounce of Sparkle per gallon of water while running water into the wash sink. Increase the quantity as needed for hard water and excessive grease load. Increase for more suds. For best results water temperature should be between 100°F and 110°F. When possible, wash glassware in a separate sink, or refresh water. Do not overload the wash solution with grease. Change solution often. Rinse with hot water and sanitize according to local health regulations.*

## **HANDLING, STORAGE, AND DISPOSAL**

For health and safety data and handling, storage and disposal procedures, please refer to the SDS and product label.
