

Seals as it shines . . .

One coat of this product is so continuous that it acts as a sealer as well as a finish. Tough and flexible, this ultra-high solids, metal-interlocked finish is formulated to dry to an auto-catalyzed polymer film. Drying to such a high gloss it does not require buffing to bring out the shine. Maintain and prolong the life of the finish by mopping with a neutral cleaner or revitalize with a buffer or burnisher.

DIRECTIONS FOR USE

Thoroughly clean floors and allow to dry prior to application. Apply in thin, even coats with mop or finish applicator. Allow each coat to dry prior to applying additional coats. Three to five coats are recommended for initial application. Maintain floors by damp mopping and buffing as needed. This finished can be removed using a conventional, non-ammoniated stripper.

Do not dilute floor finish. Do not return unused finish to original container. Do not use on surfaces colder than 45 degrees F.

NOTE: KEEP FROM FREEZING

ATTENTION: ALL WAXED FLOORS MAY BECOME SLIPPERY WHEN SOILED WITH WATER, OIL, GREASE, DETERGENT OR SIMILAR SUBSTANCES.

Exceeds ASTM 2047 requirements for slip resistance.

FIRST AID: In case of contact with eyes, immediately flush eyes with plenty of water for at least 15 minutes. If easy to do, remove contact lenses, if worn. If irritation persists get medical attention. **KEEP OUT OF REACH OF CHILDREN.**
