

A multi-functional revitalizer, this product provides greater floor maintenance flexibility than ever before. The special blend of cleaners and polymers allows efficient no-rinse cleaning that fits into any floorcare protocol — including propane burnishing. This product uniquely works on any finish, on any type flooring surface, using any brand of buffing or burnishing machine, using any type polishing pad.

DIRECTIONS FOR USE

Buffing Techniques: Mop the floor with 4 to 8 ounces of revitalizer per gallon of water. Allow to dry, then buff or burnish. Should scuffs or heel marks need to be treated, prepare a trigger sprayer with one part revitalizer and three parts water. Spray onto scuff, pass the machine over the area twice to heal scuff and bring up gloss. Continue the buffing process. Use of this revitalizer to spray buff an unclean floor will result in pad loading with soil. The removed soil will redeposit to flooring to create a yellowing or darkening effect.

Automatic Scrubbers: Add 4 to 8 ounces of revitalizer per gallon of water into the supply tank. Dispense diluted revitalizer from machine according to manufacturers instructions.

NOTE: KEEP FROM FREEZING
